To achieve the Israeli settlers' goals and enable their colonial settlement project to take over the Ibrahimi Mosque and the Old City of Hebron, the occupation government kept up to the promises it made to them to expand settlement projects in the Old City in exchange for obtaining their electoral votes and ensuring their support for the extremist right-wing parties .

Therefore, the Israeli government allocated much of resources during 2021 to achieving these aims and objectives par excellence. For this deal, the Ibrahimi Mosque and the Old City of Hebron became the price offered by the occupation government and its political parties to the settlers. The land was expropriated from its legitimate owners, and executive military orders were imposed by military force.

Israeli settlers sought to control the Ibrahimi Mosque and its courtyards by constructing an electric elevator in the mosque, a road on an area of 333 meters, and more settlement outposts in the Old City, including the land of the old bus station (garages).

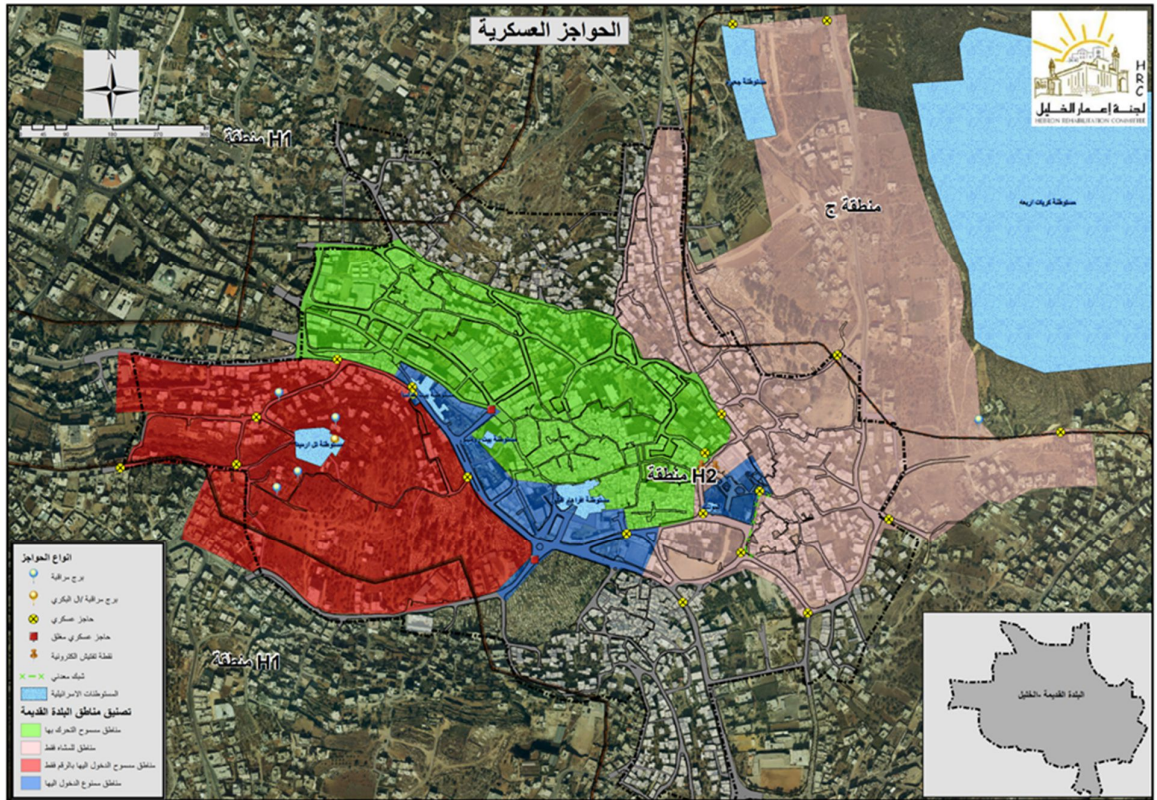

These projects and decisions were rejected by HRC and other Palestinian institutions. They filed complaints with the Israeli courts, which have

completely sided with the settlers in violation of all international laws and norms.

The Old City and the Ibrahimi Mosque have been witnessing a state of siege and restrictive measures for many years to tighten the noose around the neck of the Palestinian citizens of the Old City. These restrictions increase year after year, turning the whole area into a canton isolated geographically and socially from its surroundings.

Believing in the necessity of exposing and documenting ongoing Israeli occupation practices, including violation of the Palestinian rights, the Legal Unit of HRC sought to convey the Palestinian narrative to refute the false and misleading narratives of the Israeli occupation. In light of this situation, the Legal Unit used to issue its annual report on the Israeli occupation violations of citizens' rights in the Old City.

Maps of Hebrons old city

Word of the Director General of HRC

Israeli occupation army and settlers assaults against the Old City of Hebron and the Ibrahimi Mosque are escalating continually. They committed fierce assaults of special kinds during the year of 2021. These assaults were based on the promises the current officials of the Israeli government gave to the settlers to win their votes in the last election. The different Israeli parties promised their constituencies of building new settlement outposts and expanding other settlement outposts in the heart of the Old City. The Israeli occupation authorities issued several political and military orders whereby Palestinians' real estates are given to Israeli settlers for building new settlement outposts. One of these orders mandates the settlers to build on the land of the old wholesale market (Hisba) and on the old bus-stop station. They also authorize settlers to control the land of the Ibrahimi Mosque to build a lift. Since the beginning of the past year, the implementation of those orders has started by taking over Palestinians land. They began building a big military camp on the land of the old bus-stop station, coupled with a colonial settlement project of 31 housing units. They also began building a lift inside the Ibrahimi Mosque and a road for settlers' vehicles on an area of 333 meters.

In the beginning of March 2021 and in an unprecedented step, the settlers stormed the "Qufaisheh and Al Sharif" yard, using bulldozers and heavy equipment to carry out their assault on the historical place. It is a yard consisting of a large number of heritage houses owned by several families from the city of Hebron.

The yard is located near the Ibrahimi Mosque and it was deserted by the Paalestinian population due to the collapse of many of their homes which the occupation authorities prevented HRC from restoring them since a quarter of a century.

In 2021, Israeli occupation authorities took severe measures to obstruct or stop the restoration of the Ibrahimi Compound. They prevented workers and technicians of the HRC from entering the Holy Compound to complete the maintenance and restoration work. The occupation authorities thwarted these works several times over the past year.

For two decades, the maintenance of the electricity network, the change of chandeliers, and the works of painting and restoration of Yusufiya have been suspended. The occupation authorities didn't allow HRC to implement two infrastructure projects on Al-Haram Street and the maintenance and restoration of its health units.

These Israeli occupation measures are aimed to limit the work carried out by HRC and paralyze the administrative responsibilities of Palestinian national institutions on the Ibrahimi Mosque, even though this edifice, like the old city of Hebron, is listed on the UNESCO World Heritage List as a site in danger.

The entirety of the Ibrahimi Mosque in all its sections, corridors and squares, is targeted by the Israeli occupation Judaization plans which aim to convert it into a Jewish synagogue.

These large settlement projects in the heart of the City of Hebron form geographic and demographic settlement contiguity as they link the settlement outposts to each other, starting from the settlement of Tel Rumeida to the settlement of Dabouya, the Osama school, the bus station, and the Hesba settlement, all the way to the Ibrahimi Mosque, taking advantage of the governmental and partisan support.

Israeli President, Isaac Herzog, break into the Old City and the Ibrahimi Mosque, before the end of the year 2021 provoked the feelings of the Palestinian citizens and emboldened the Israeli aggressive and racist policy against them. It affirmed the continuation of his support for unlimited settlement projects in the Old City of Hebron.

We in HRC and through our Legal Unit are working tirelessly to confront these colonial policies by monitoring and documenting Israeli violations and following up with the competent legal authorities.

On this occasion, I am pleased to extend my thanks to the staff of the Legal Unit, as well as to the entire staff of HRC for all their efforts and sincere affiliation to their country and homeland.

Imad Hamdan

General Director of HRC

Legal Unit:

As a result of the violations committed by the Israeli occupation authorities and settlers against the citizens of the Old City of Hebron and its private properties, HRC established a legal unit in 1996 in order to follow up and document Israeli violations, crimes and attacks, and to be a shield against the Israeli occupation. It also seeks to raise awareness among the citizens about their rights to defend them. It exerts its effort to address all kinds of unjust Israeli military orders, through legal procedures and representation of Palestinian victims before the competent authorities and courts.

It exposes the practices of the occupation government and its settlers against the Palestinians through media, human rights organizations, and international bodies. It is imperative to unveil the Zionist plans aimed at Judaizing Hebron in general and the Old City in particular.

It follows-up its tasks through various local and international legal methods, the special rapporteurs of the United Nations, the High Commissioners for Human Rights and the Human Rights Council the human.

Legal Unit Achievements 2021

1. HRC succeeds in thwarting the establishment of a settlement outpost by canceling a military order to build a military watchtower on the roof of a house in Tel Rumeida in the old city of Hebron.

After continuing legal follow-up carried out by the Legal Unit, it succeeded in stopping the military order to erect a military watchtower for the occupation army on the house of citizen Imad Abu Shamsieh in the Tel Rumeida area in the old city of Hebron by submitting an appeal to the competent judicial authorities on behalf of the owner of the above-mentioned house, at the beginning of February of the year 2021.

It is reported that the military order, which was renewed, requires the army to control the roof of the house under the pretext of security reasons. Its residents were denied the right to use it as an integral part of the house they own and live in. The military watchtower has become a nightmare for the family and its children. They were feeling that their life was always at risk and their freedom was restricted.

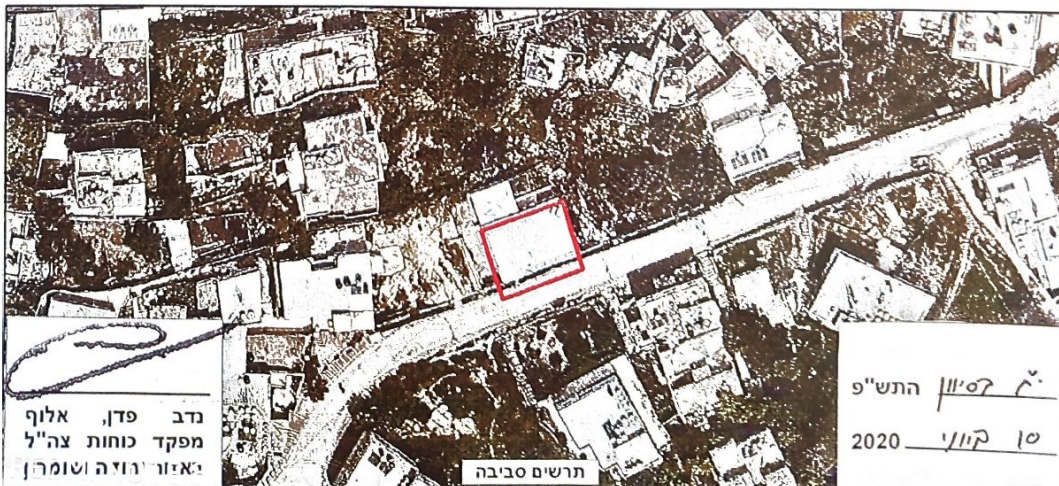

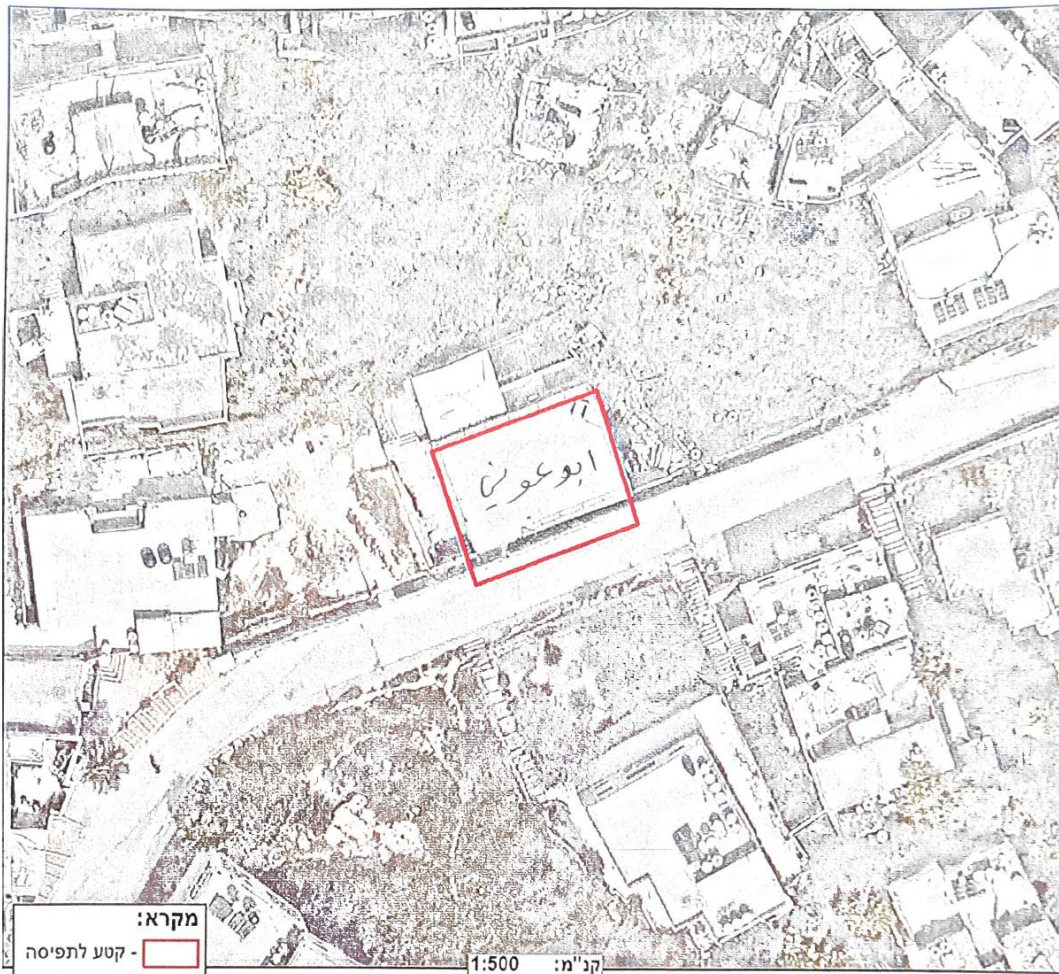

Photo. (1): The military order to erect a military tower on the roof of the house of Imad Abu Shamsiyeh in Tel Rumeida.

Imad Abu Shamseya signing an appeal prepared by the Legal Unit.

1. Suspending an elevator building permit in the Ibrahimi Mosque:

Based on the legal follow-ups carried out by the Legal Unit in cooperation with the Hebron Municipality and the Islamic Endowments Directorate, the Minister of the occupation army decided on May 26, 2021 to freeze the construction of the elevator in the courtyard of the Ibrahimi Mosque. The aim of such project was to seize large areas of the Ibrahimi Mosque squares and lands belonging to Palestinian citizens.

Where it is mentioned that on 3/5/2020 the Minister of the occupation army (Naftali Bennett) approved the recommendation made to him by the legal advisor to confiscate the lands of the Ibrahimi Mosque, followed by the issuance of two military orders referring to the expropriation of the mentioned areas through confiscation of the ownership and powers of the Waqf and the Palestinian authorities related to the Haram Al-Ibrahimi. It is clear annexation of the area and imposition of Israeli sovereignty on these areas. The aim of this project is to strip Hebron municipality of its powers in violation of all international standards, charters, local laws and Israeli administrative law. It is also in violation of the Palestinian-Israeli agreements, including the Hebron Protocol, whereby it is not allowed to change the status quo in The Ibrahimi Mosque and its historical and archaeological features.

Photo. (2): The plan for the elevator that the occupation government intends to erect on the plaza of the Ibrahimi Mosque.

2. Aborting a colonial plan that aims to establish a settlement outpost in the heart of Hebron

Based on the intensive legal follow-ups and appeals submitted by the legal unit to the Israeli competent judicial authorities, in cooperation with Citizen Aref Jaber in whose name it filed a

complaint, it succeeded in thwarting a Zionist scheme aimed at establishing a new settlement outpost in the citizen's land. It was ordered that the room the settlers laid on the land for the establishment of the outpost was removed. This colonial outpost was intended to be established in the heart of Hebron

An image showing the settlement room that settlers placed on the land of Arif Jaber as a basis for the establishment of a new outpost, which was removed

3. Removing the tents that the army placed on the roof of the Al-Qudsi and Al-Kurd building

After vigorous legal follow-ups carried out by the Legal Unit, it was able to thwart the Israeli colonial plans by removing the tents that the Israeli occupation army and settlers had set up on the roof of Al Qudsi and the Kurd building in the Al-Sahla area in the old city of Hebron, in preparation for taking over the building and its complete Judaization as well as the

establishment of a military post as a step towards creating a new settlement outpost in the place.

Image: showing the tents that the occupation army set up on the roof of the Al-Qudsi and Al-Kurd building. They were removed through the legal follow-ups.

4. Suspending the license to build settlement housing units

After vigorous legal follow-ups, the Legal Unit was able to freeze the building permit of thirty-one colonial settlement housing units on the land of the old garage, which is located near Osama Bin Al-Munqith School on Al-Shuhada Street in the old city of Hebron.

Suspending the license stopped the occupation authorities' project. In fact, Establishing a new settlement outpost in the heart of Hebron has been stopped after the Israeli occupation government has allocated \$22 million to build 31 housing units on the land of the old bus station after the approval of the building permit by the Higher Planning Council, knowing that this area has been closed by military orders since the eighties.

שכונת חזקיהו - נחלת חב"ד

בשנת תרל"ו (1876) בנו הבניי הישראלי חסנו אייזנשטובל מבנה מרווח ומפואר מחוץ לרובע העירוני, המבנה כלל כפר מדרוש מתנחלים בתורכי- תיכונית (1901-1905) בו נלמדו גם הנאמן הרב חיים חזקיהו סודי. במקום זה הוא העלים את כותבו. האנטיקולפדיה התלמודית "שני תמרי".

במרעב (1912) קנה האדמור"ר מחב"ד, ר' שלום בער, את הבית והחלקות לידו והקמה בו ישיבת "תורת אמת". לאחר מלחמת העצמאות (1917) הקים שימש כמספרה בריטית. שרדו פצועי המבט בתרפ"ס (1929) רובו בנינו זה מספר ימים עד שגורשו לירושלים.

בתש"ח (1948) כבשו הירדנים את חברון. הכובשים הערבים סקמו כבית בית ספר, ובשטח לידו - התנת אטמוספירה. לאחר שחרור חברון העניק האדמור"ר מלובאוויטש את הנשט למו"שיביו חברון. בתשנ"ב (1982) דוד המלך ליי-יוזום לאתר קניעו דקדור. בבית חסנו חדש התיישבת מדרות. ולאחר מכן הוחלה לפעול בו ישיבת "שני תמרי". בחלקה המסוכנה הקמה "שכונת חזקיהו" על הרב חזקיהו סודי.

במקום זה מוחנכת בבית שכונה חדשה ובה מבני ספרים בני 7 קומות שכללו כ-30 יחידות דיור, בני ילדים. אלום רב תכלית, מניה תת-קרקעי ושטחי ציבור מתחום לרווחת התושבים.

Hezkiyahu Neighborhood - The Chabad Quarter

In 1876, Hayyim Yisrael Romano built a spacious residential building outside the Jewish Quarter, complete with a Synagogue and study hall.

In this building, Rabbi Hayyim Hizkiyahu Medini, completed his monumental Talmudic encyclopedia Sde Hemed, studied and taught Torah between the years 1901-1905.

In 1912, the Lubavitcher Rebbe, Rabbi Shalom Ber, purchased the building along with the surrounding grounds, and established the Torat Emet Yeshiva.

After World War I (1917), the facility served as headquarters of the British police. The bodies of the Jewish victims, as well as the wounded and survivors, were held here prior to their expulsion from the city.

In 1948, the Jordanians captured Hebron. During the Jordanian occupation, the building was used as a school. A bus terminal was built next to it.

After the liberation of the city in 1967, the Lubavitcher Rebbe awarded the property to the Jewish settlers of Hebron.

In 1982, following a stabbing attack by an Arab terrorist, the building was returned to Jewish hands and the Hizkiyahu neighborhood was established along with Yeshivat Shavei Hebron. Future development plans include a 7 story building with 28 apartments, public use areas including a nursery school, medical clinic, underground parking and open public spaces.

www.hebron.com

5. Stopping excavation works in a yard located opposite to the rest house of the Ibrahimi Mosque

The Legal Unit was able, through its legal follow-up of Israeli settlers storming a courtyard located opposite to the Ibrahimi Mosque in the old city of Hebron, to evacuate the settlers from the courtyard and stopping the bulldozing and excavations they were doing in preparation for the implementation of a Zionist scheme aimed to Judaize the area.

Activities and events carried out by HRC's Legal Unit

1. Photography Competition

Organizing a photo competition for the local community under the title "Suffering in a Picture" the theme of which was about the tragic life experienced by the residents of the region as a result of the closures imposed on them and the attacks carried out by the occupation army and its settlers. It aimed to shed light on the citizens' suffering. These photos will be used in future in international forums as evidence to the tragedy experienced by the people of the region.

2. A training course for the staff of HRC, including the staff of the Legal Unit

A training course was organized for the employees of HRC regarding ONLINE work skills. They were trained on the use of some applied programs. These programs have become of

special importance during the spread of the Corona pandemic and the emergence of online learning.

Communication skills training

3. Journalists Meetings

A number of meetings were held with journalists for shedding light on Israeli occupation violations and the current situation in the Old City of Hebron. the discussion was also focused on the importance of the role of media in exposing Israeli crimes against the Palestinians.

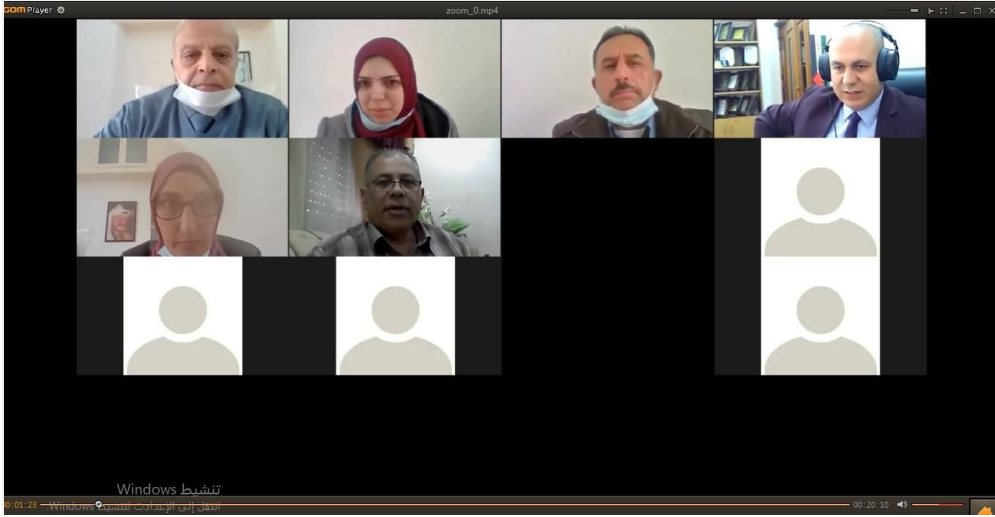

● ○ REDMI NOTE 8
○ ○ AI QUAD CAMERA

4. Monthly Meetings

Several meetings were held in the premises of HRC and by zoom. These meetings were attended by local and international organizations to discuss the situation in the Old City of Hebron.

Key services provided by the Legal Unit for the Palestinian citizens

At the local level:

1. Receiving citizens and providing necessary services.

2. Documenting Israeli violations

The legal unit monitors and documents violations carried out by the Israeli occupation authorities and settlers against Palestinian citizens and their private and public properties in the old city of Hebron, as well as the areas of friction with the settlement outposts located there.

The legal unit is considered a source of information and reference for some human rights organizations.

3. Providing legal and social support during field visits

4. Taking legal measures against Israeli violations

The Legal Unit takes necessary legal measures against the occupation authorities and settlers involved in violations against the Palestinian citizens. It assists in filing complaints with the Israeli police, submitting objections to the Israeli legal advisor, and filing lawsuits before the competent judicial authorities on behalf of the affected citizens. It follows up all the litigation process for them..

5. Assisting in the release of a number of detainees of the Old City of Hebron.

During the year 2021, the legal unit documented (54) cases of arrest among citizens. It succeeded in securing the release of 24 of them while the cases of the others were referred to the competent Palestinian official and civil authorities.

At the international level:

1. Exposing Israeli occupation practices through media (press conferences, news) and statements of condemnation and denunciation of the crimes committed by the occupation army and its settlers, and making them visible to the public at the national and international levels.

2. Updating delegations on the situation of the Old City for solidarity and international interest.

3. Submitting complaints to special rapporteurs

The legal unit submitted several urgent complaints to the United Nations special rapporteurs, the most important of which was a complaint regarding the prevention of restoration in the Old City and the Ibrahimi Mosque

UNESCO was addressed regarding the prevention of the restoration of the Ibrahimi Mosque and the placing of a menorah stone at the entry of the market

4. Addressing UNESCO

UNESCO was addressed in January 2021 on the issue of preventing the restoration of the Ibrahimi Mosque. HRC was prevented by the occupation army from restoring it several times.

5. Issuing monthly reports

Monthly reports were issued on the violations of the Israeli army and settlers against Palestinian citizens and their public and property and private property. They were provided to local and international human rights institutions, as well as local and international media, as a reference for their work to expose the practices of the occupation government towards the residents of the Old City.

Results of monitoring and documentation of human rights violations carried out by the legal unit:

The total number of incidents of violations committed by the Israeli occupation army and settlers against Palestinian citizens and their property in the Old City during the year 2021 reached (709) incidents of human rights violations committed against Palestinian citizens and their property, especially those located near settlement outposts.

Word of the Legal Unit's Director

In the year 2021, Israeli occupation forces and settlers escalated their aggressions against the Palestinians, taking advantage from political atmosphere in Israel. The Old city of Hebron has become the center of political competition for the Israeli occupation extremist rightist parties. The Israeli occupation government issued more military orders facilitating takeover of Palestinian public and private properties, historical real estate and construction of settlement units in the Old City. It also issued orders that violate the historical and religious status of the Ibrahimi Mosque. All these measures were taken to fulfill its promises to the constituencies of the parties that form the government.

Despite the challenges facing the Legal Unit, it has continued to confront the violations of the Israeli occupying state and its settlers through legal means. It submits complaints against settlers' attacks and petitions against the military orders issued by the military officials.

It filed several petitions against property seizure orders and succeeded in stopping the construction of dozens of settlement housing units, specifically in the area of the old bus station in the old city of Hebron.

The Legal Unit has strengthened its position as a center, source and bank of information in the region by documenting hundreds of Israeli violations against Palestinian citizens and their property. It provides such information to hundreds of local and international institutions about violations committed by the occupying power and settlers in the Old City of Hebron.

The Legal Unit plays an important role in exposing the crimes of the Israeli occupation authorities and its settlers and in raising awareness among the Palestinian citizens in the Old City about their rights and the ways of addressing Israeli occupation expropriation of their property. As such it was able to reduce the assaults committed by the occupation army against them.

I conclude my word by thanking the administration of HRC and the staff of the Legal Unit without home such success won't see light.

Legal Unit Director

Tawfiq Gahshin

Field Research and Documentation

Human Rights Violations in 2021

In addition to the daily violations of the basic human rights of Palestinian citizens in the Old City of Hebron by the Israeli occupation authorities during the year 2021, the properties of Palestinian citizens were targeted by one of the largest colonial settlement campaigns. These campaigns targeted citizens' lands and their public and private properties.

Since the beginning of the last year 2021, Israeli settlers have started their colonial projects supported by the Israeli occupation government. It promised them to go ahead with the colonial project to have settlers' votes during the election campaigns.

They were promised to receive financial and morale support to carry out settlement building projects by all means even in the heart of the Old City and the Ibrahimi Mosque.

These projects are being implemented in full disregard to International laws and norms, especially the Fourth Geneva Convention of 1949, which prohibits the occupying country from transferring part or all of its civilian population to the lands it occupies.

Israeli occupation assault of the Old City poses clear danger to the area listed on the List of World Heritage.

The Israeli occupation authorities and settlers implement together the colonial projects in the Old City and expropriate the Palestinians' private and public property. The occupation army razed the eastern part of the land of Al-Karajat (the old bus station) under the pretext of building a camp for its soldiers as well as expanding the army camp located in Wadi Al-Hussein, east of the Ibrahimi Mosque. Meanwhile, the settlers took the first steps to build the elevator in the Ibrahimi Mosque. They also built a road in front of the Mosque on 10/8/2021.

On October 15, 2021, Israeli settlers razed the western part of the lands of the garage to establish a new settlement outpost of **31** apartments.

At the beginning of the year 2021, Israeli settlers began their assault on the "Qufesha and Al Sharif" yard next to the Ibrahimi Mosque. They bulldozed many historical buildings in the area and removed the rubble outside the area.

Large groups of Israeli settlers were mobilized during the reporting period and they intensified their incursions into the Ibrahimi Mosque for holding social and religious celebrations inside the Mosque and its squares. The aim of such moves is to give the area a Jewish character.

With the blessing of the occupying state and its president, "Isaac Herzog," who himself participated in the storming of the old town of Hebron and its sacred Ibrahimi Sanctuary, lighting the first candle in the Talmudic menorah inside the Haram.

These settlers assaults and encroachments were all carried out with the blessing of the Israeli occupying state and its president, "Isaac Herzog," who himself participated in storming the Old City of Hebron and the Ibrahimi Sanctuary, lighting the first candle in the Talmudic menorah there.

In the midst of these colonial projects that target the Old City and the Ibrahimi Mosque, the Palestinian workers and technicians of HRC were prohibited from completing the repair work they were carrying out there.

Despite the many obstacles facing the documentation of the practices and violations committed by the Israeli occupation against the Palestinian citizens and their public and private properties in the Old City, the Legal Unit was able to monitor and document (709) incidents of violations and the graphs below show statistics of those violations.

Reports indicate that most of human rights violations in the year 2021 were committed by the Israeli soldiers, which means that such type of violations outnumber those committed by Jewish settlers, as shown in Chart No. (1).. Some other violations were committed by the occupation soldiers and the settlers together.

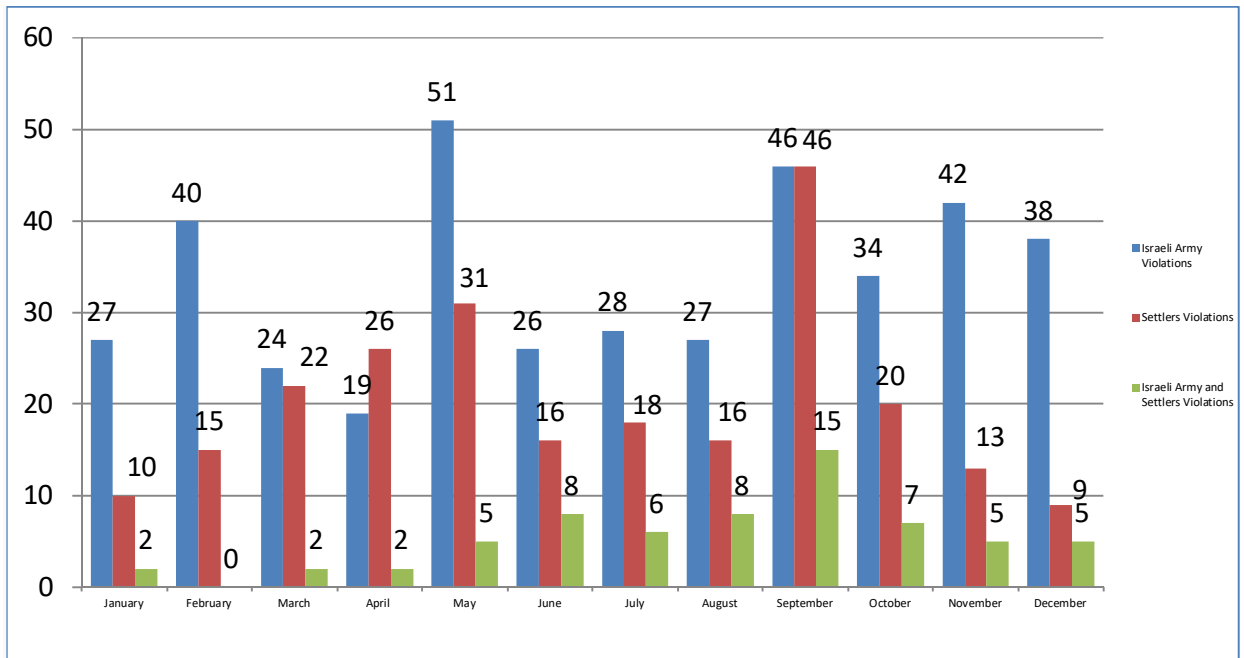

Table No. (1): A graph showing the violations of the occupation army and settlers during the year 2021

The total number of assaults committed by the Israeli occupation army soldiers during the year 2020, reached **(336)** incidents of violations, representing **55%** of the total violations.

As for the total violations committed by settlers against Palestinian citizens and their property during the same period, it amounted to **226** violations, representing **37%** of the total violations.

The total violations committed by the occupation army and the settlers amounted to **(47)** incidents of violation, **8%** of the total violations.

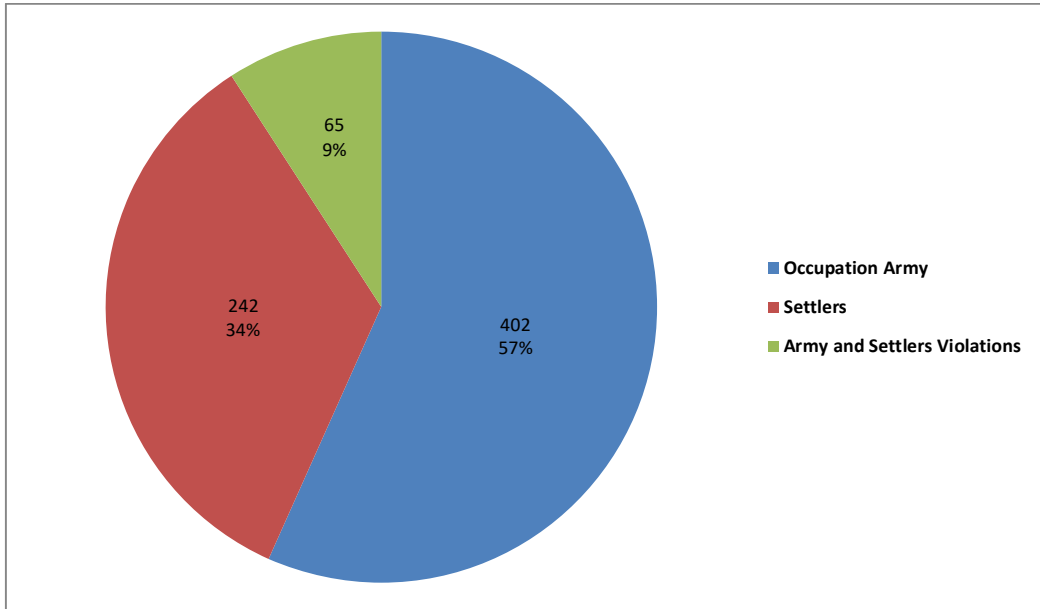

Chart (2): Percentage of attacks distributed by the perpetrating authority during the year 2021

The occupation army carried out the largest number of violations against the Palestinian citizens and their property under false pretexts. Further, the occupation soldiers provided protection for Israeli settlers while they were carrying out the assaults.

Distribution of Violations by Targeted Group during the Year 2021

The Israeli occupation authorities aim to liquidate the Palestinian presence inside the Old City of Hebron and seize their property by imposing a closure on a large area of the Old City, displacing citizens from their homes and turning them into settlement outposts. The occupation authorities tighten the siege around the Ibrahimi Mosque and its spheres for colonial projects aimed to convert it to a synagogue.

These violations are classified by the target group as follows:

- Violations against the population: These violations include assaults on individuals (men, women, and children) or groups of individuals. The total of

these violations amounted to **292** incidents of violations, including 84 violations against individuals.

- Violations against private property: such as shops, homes, and land owned by individuals (**152** violations).
- Violations against public property: such as streets, roads, public squares, schools, and religious places (**265** violations).

The following table shows the graphic representation of the violations, broken down by the target party.

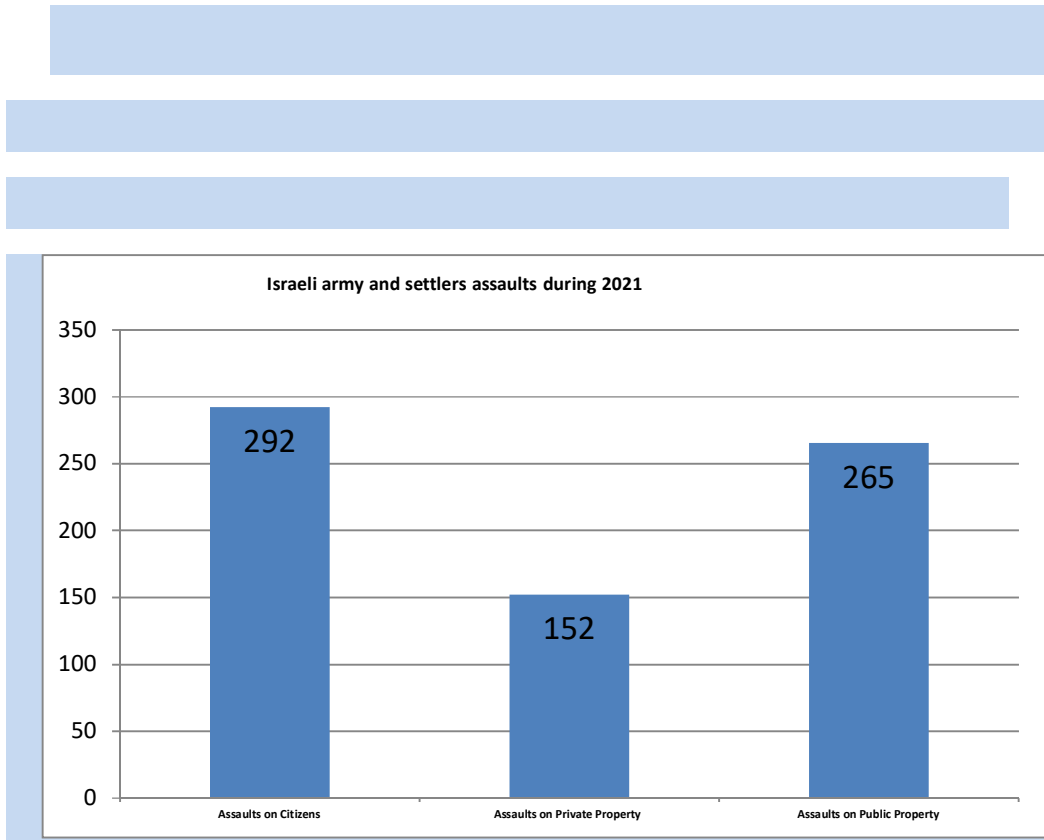

Table (3): A graph showing the assaults of the occupation army and settlers against citizens and property during the year 2021

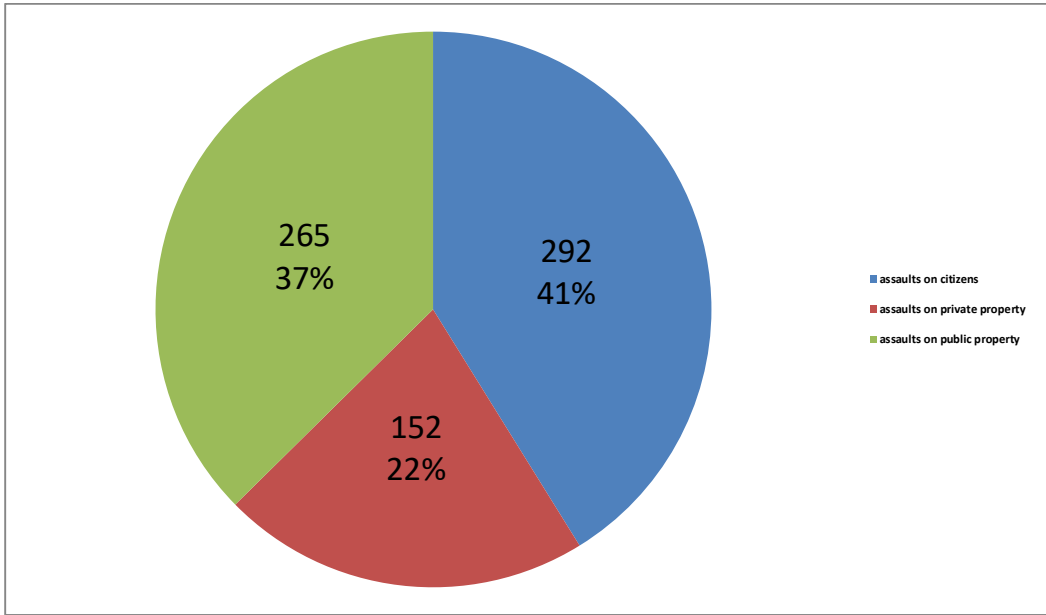

Chart (4): Assaults of Israeli occupation forces and settlers distributed by the population, public and private properties during the year 2021.

1- Assaults against the Population

The legal unit classifies human rights violations in the Old City into individual violations and collective violations. Individual violations are those that affect individuals, such as cases of arrest, physical assault, obstruction of passage through checkpoints or shooting while collective violations are those that have an impact on a group of citizens, such as cases of targeting school students and people with tear gas and bullets, or settlers violence and restriction of citizens movement and preventing them from reaching a specific place, such as the Ibrahimi Mosque, or the shopping centers.

Groups of citizens who are subject to violations may include all population groups such as children, especially school students, men and women.

Assaults by the Israeli occupation army and settlers on the targeted population groups - individual cases - (children, women, men), during the year 2021, can be explained as follows:

- **Assaults on children:** The Israeli occupation targets children alongside other categories of the Palestinian population. The assaults committed by Israeli soldiers and settlers directly affected 26 children, constituting 24% of the total number of assaults against individuals.
- **Assaults on women:** Women in the Old City are subjected to serious assaults that amount to shooting, detention, physical assault and other patterns of violence by the occupation soldiers or settlers. **14** individual cases were documented, constituting **13%** of the total number of assaults on individuals.
- **Assaults on men:** assaults by Israeli occupation soldiers and settlers affected 69 men, or 63% of the total number of assaults on individuals.

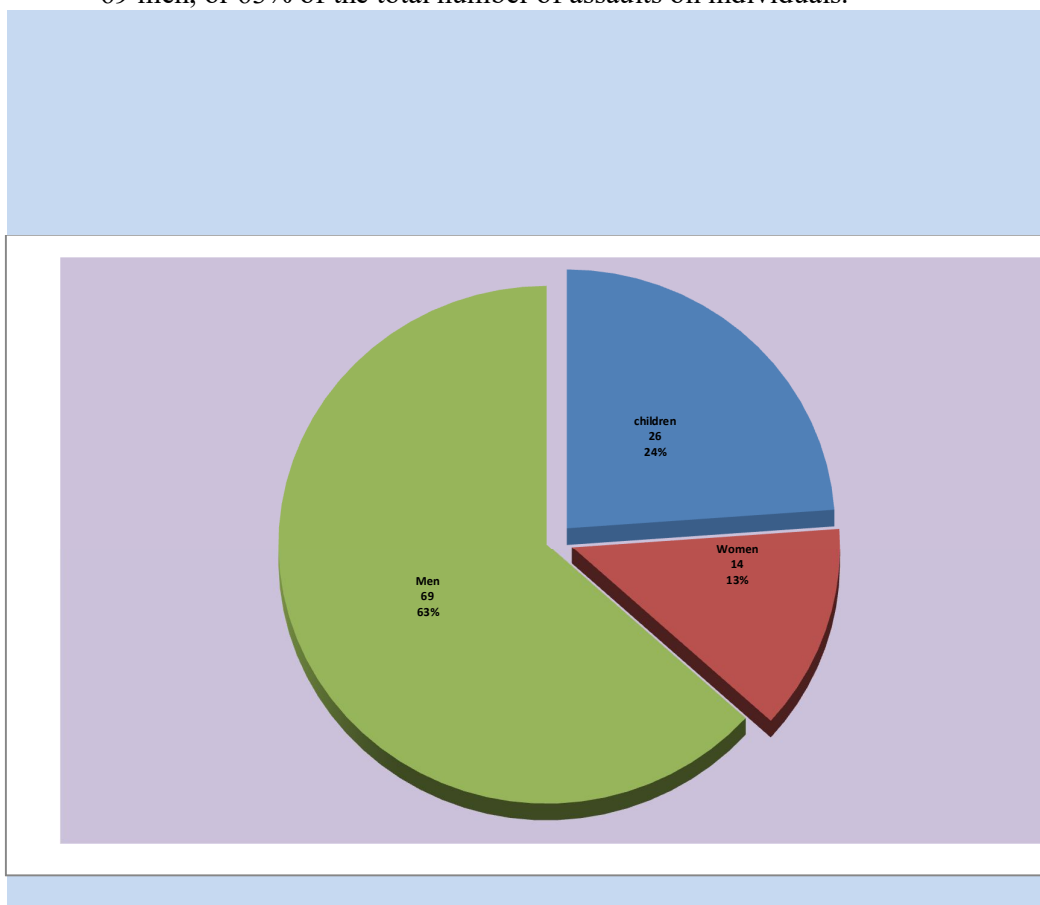

Chart (4): The figure shows the size and percentage of assaults on population groups during the year 2021

Detention in the Old City

- **Legal Follow up of detention cases in the Old City**
- During the months of 2021, the Legal Unit documented (**54**) cases of arrest among citizens. The Legal Unit secured the release of (**24**) cases of them. As

for the remaining cases, they were referred to the competent Palestinian official and civil authorities or were released later.

- 40 men were detained.
- 10 children were detained.
- 4 women were detained.

The following table shows the number and percentage of detainees of each group of the population:

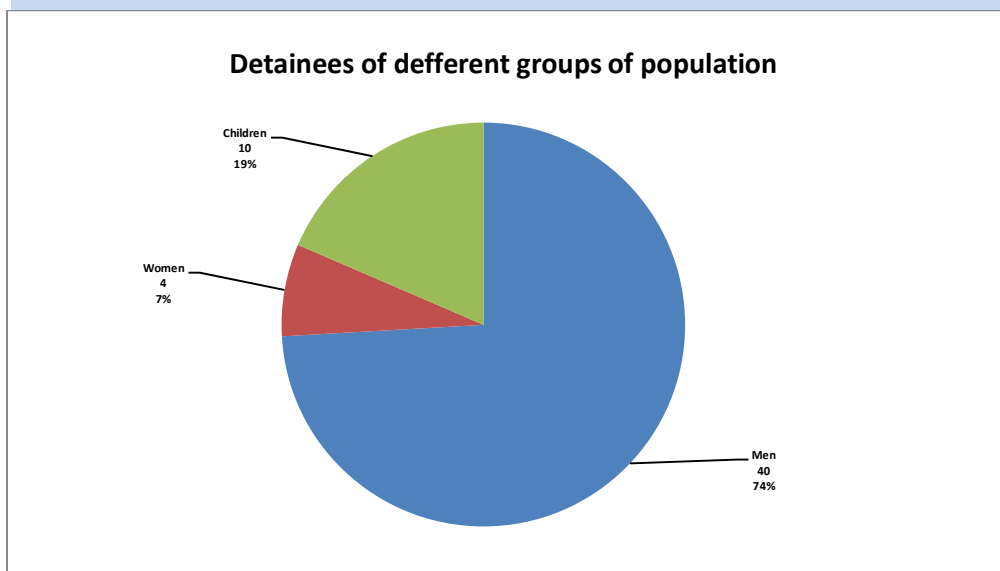

Chart (5): Percentage of detention among citizens distributed by population groups during the year 202.

2- Assaults on Private Property

The private properties of Palestinian citizens in the Old City faced a systematic campaign of attacks by Jewish settlers aimed at sowing terror in the hearts of the residents and forcing them to abandon their homes and towns.

During the year 2021, the incidents of violations against citizens' private property amounted to a total of (152) violations, the most prominent of which were:

- Night raids by the occupation army on the homes of citizens and intimidation of the population.
- Besieging many homes and obstructing their residents from accessing them.
- Obstructing the restoration work carried out by HRC citizens' houses.
- Breaking into closed shops and houses in Al-Shuhada Street and Al-Shallala Street.
- Excavations in the lower layers of the Zaatari building, which was usurped several years ago.

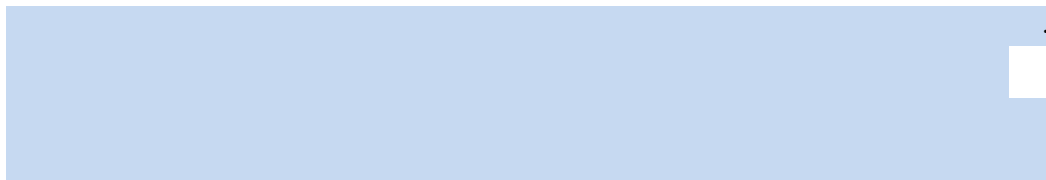

- Throwing stones at citizens' cars, especially in the Baqa'a.
- Chopping olive saplings in the land of the citizen Aref Jaber, located in Al-Baqa'a, near the settlement of Kiryat Arba.
- Handing over citizen, Abd al-Karim al-Jabari, a military order to convert his plot of land into a road in favor of Israeli settlers.
- Attacking citizens' homes with stones and empty bottles and shooting in Wadi Al-Hussein, Jaber neighborhood, Ghaith and Al-Salaymeh neighborhoods.
- Storming Hosh Qafisha and Al Sharif, bulldozing the old houses there, and moving their rubble outside the area.

2. Assaults on Public Property:

These assaults target religious places, streets, public squares, schools, kindergartens, and what belongs to the Hebron Municipality, the Awqaf Directorate, and others.

The assaults by the occupation army and settlers on public properties in the Old City during the year 2021 amounted to **(265)** violations, distributed as follows:

- Twelve (12) assaults on schools, constituting 4% of the total assaults against public property.
- **(172)** assaults on the streets and public squares, constituting 65% of the total assaults against public property.
- **(81)** Assaults on religious places, constituting 31% of the total assaults against public property.

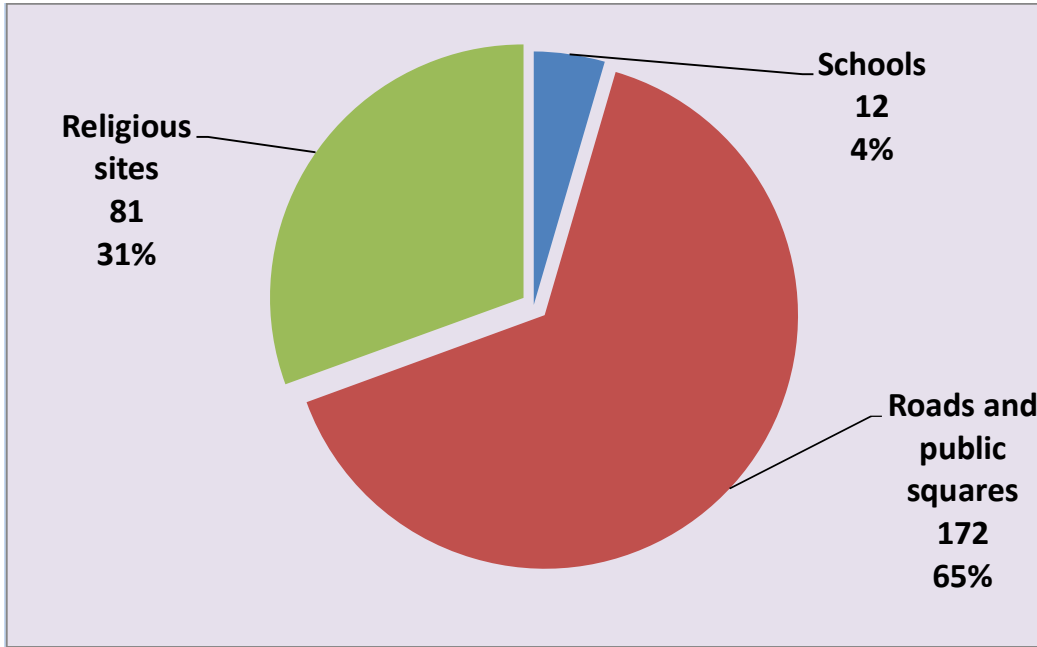

Chart (6): Shows the size and percentage of assaults by the occupation army and settlers on public property during the year 2021

Main Assaults on Public Property:

- Assaults on the plot of the garage and the initiation of infrastructure construction there to set up a military camp and a settlement outpost.
- Starting the implementation of the infrastructure for the construction of a path (a private road) in the garden and park of the Ibrahimi Mosque. It is the first step to implement the construction of the elevator in the Ibrahimi Mosque.
- Setting up tents in the gardens of the Ibrahimi Mosque, the Ibrahimi School playground, the gardens and courtyards of the Ibrahimi Mosque, and holding Talmudic rituals and celebrations of various kinds there.
- The occupation army stormed primary schools, fired tear gas at students, beat them and arrested them.
- Obstructing the passage of the teaching staff and students at the Ibrahimiya Basic School in Al-Sahla Al-Shuhada.
- The settlers carried out major works and built an additional floor in the Istiraha House in the Ibrahimi Mosque square.
- A huge candlestick was erected on the Ibrahimi Mosque.

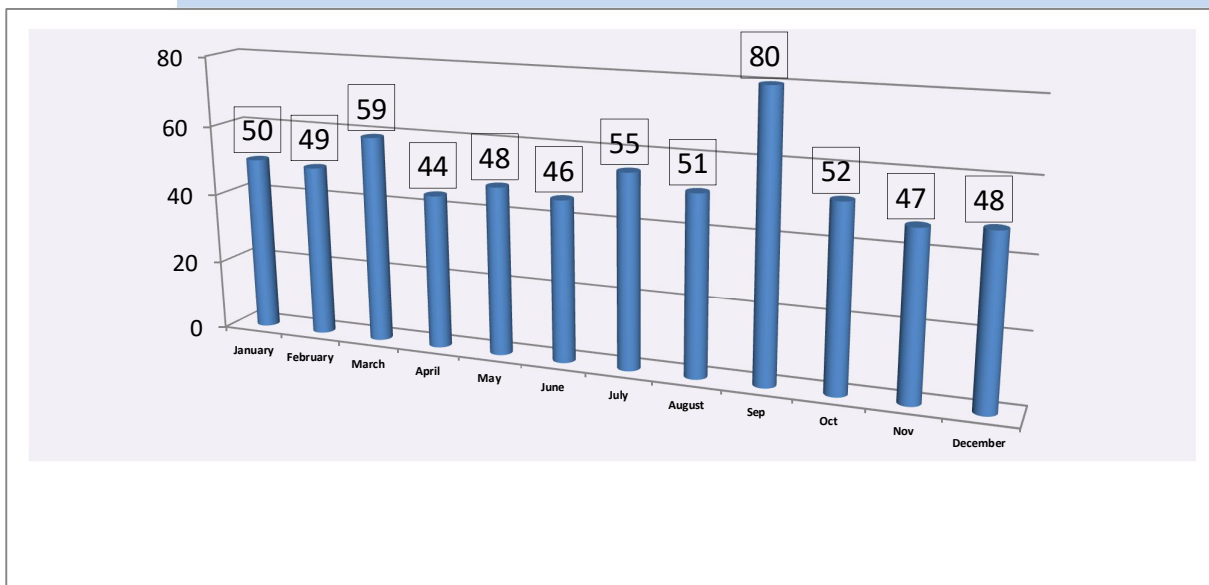

* * *

Ibrahimi Sanctuary

The Ibrahimi Mosque is exposed to numerous violations, on a daily basis. These violations include inhumane practices by the occupation soldiers who are present at the checkpoints and gates leading to it. They suppress the worshiping and visitors. The Israeli settlers also carry out frequent incursions into the mosque.

Key assaults carried out by Israeli army and settlers against the Ibrahimi Mosque:

- Conducting huge archaeological excavations in the Ibrahimi Mosque garden, while starting the implementation of the infrastructure to illegally construct an electric elevator in the Mosque.
- Erecting the Talmudic symbol “the menorah” on the roof of the Ibrahimi Mosque, raising the Zionist flags on its facades, building tents, and holding noisy celebrations of various natures in its squares and within its sections.
- Closing the Ibrahimi Mosque in the face of Muslim worshipers on the pretext of Jewish holidays and spread of the Corona pandemic.
- Preventing the workers and technicians of the HRC from completing the restoration work they are carrying out inside the Holy Sanctuary.
- The occupation authorities prevented the call to prayer from the minarets of the Ibrahimi Mosque **629** times during the year 2021.

A chart showing the number of times the call to prayer was prohibited in the Ibrahim Mosque during the year 2021.

Historical Background

Until recently, in front of the Ibrahim Mosque - from the south, southeast, and southwest sides - there were no empty yards or parks or gardens as is the case today. There were many historical buildings dating back to the Ayyubid, Crusader and Mamluk eras; even some of them dated back to the Abbasid era. It was represented in a variety of buildings, including religious, cultural and social buildings as well as military buildings and a commercial market.

All these cultural buildings and historical monuments were removed in 1964 by the Jordanian government following the visit by Cairo-based Director of Arab Antiquities to Hebron and the Ibrahim Mosque. He suggested that all the buildings that are less than 30 meters away from the Holy Compound be demolished and the properties that are 20 meters around it be acquired. These areas would be used for constructing Islamic-style buildings that fit into the religious status of the Holy Compound in a splendid and spectacular way.

After the removal of these buildings, the place became an open yard with what is known as Al Istiraha Building. The plan set by the Director of Arab Antiquities was not accomplished and the buildings were established according to the Islamic architecture as the city was occupied by the Israeli occupation in 1967. The Israeli occupation demolished the main gate of the Holy Compound known as Bab al-Nasir Qalawun and the seven steps. It also demolished the Salah al-Din well on 10/11/1968, and seized the Istiraha Building. It was

converted into a shop, cafeteria and information center for Israeli settlers, and was given the name "Gotnik" in honor of one of the Jewish supporters of the Israeli settlements.

Key historical references describing the archaeological landmarks in the Old City of Hebron:

The Castle: It is a military facility set up by the Crusaders after their occupation of the country in 1099 to consolidate their military control over the region. It was described by travelers as a fortified castle. It was rehabilitated by Sultan Qaloun in 1311 AD. It was used by the Ottoman army that was stationed in the city. It remained one of the important architectural features over centuries.

Castle Neighborhood: It is adjacent to the Ibrahimi Mosque, and its houses face it from the western, southern and eastern sides. As for the families that inhabited it, they are: Al-Zarro, Al-Hamouri, Abu Al-Filat, Idris, Mutawa, Al-Bakri, Sinokrot, Al-Qaymari, Al-Imam Al-Ansari, Tahboub, and Al-Ashhab.

After the neighborhood was removed, only one row of houses adjacent to the mosque remained. These houses were belonging to the Bakri, Hamouri, Marqa and Imam Families.

Rebat Al Mansouri Building

This building which was opposite to the castle was adjacent to the Ibrahimi Compound from the west. It was a few meters away from the entry of it. It was an endowment building erected by King Al Mansour Qaloun in 1280 AD. It was built of tens of rooms surrounding an open-courtyard with a charming garden in the middle. It was used a shelter for travelers, including scientists and scholars who used to visit the Ibrahimi Mosque. During the British Mandate era, part of it was used as an office for the Islamic Waqf Department. However, it was destroyed in 1964 and the museum of Hebron's Municipality has a marble plaque of it measuring 93cm * 50cm.

Al-Mansouri Bimaristan: King Al-Mansur Qaloun endowed it. It was known as the Hose of Wisdom.

Al-Zawiya Al-Qadiriya: It is located near the Ibrahimi Mosque in the Citadel Neighborhood. It was built before the Mamluk era. It remained in place until the area around the Ibrahimi Mosque was removed. It was served by the Al-Zarro family.

Al-Madrassa Quarter: It is located in front of the mosque, south of the Castle Quarter. It is named after the Sultan Hassan School near Yusufiya (the Shrine of Prophet Yusuf). It was a large, long and roofed arch, with three entrances: the northern opposite the Ibrahimi Mosque door at the Zawayat al-Ashraf, and its southern entrance at Al-Sahla Street in front of the Holy Compound gate. It has a gate in its center leading to the Castle Neighborhood.

The Sultan Hassan School (the Hassaniya School): It was built by Sultan Nasir al-Din Hassan bin Muhammad bin Qaloun Hassan bin Sultan al-Nasir in the period between 1348-1351 AD.

Ajrud Market (Khan Ajrud): It is located in the Citadel Neighborhood. It is a market that sells all commodities, especially pottery.

After the destruction of these historical monuments except for one building, which is the Istiraha House, no construction work was renewed in the place, especially Hebron fell into the hands of the Israeli occupation in 1967. It removed the historic Bab Al-Nasser Qaloun, which is the main door leading to the Ibrahimi Compound from the eastern side, as well as the demolition of the seven steps and the Fountain of Salah al-Din (the fountain). No construction work in the place was allowed.

The Ibrahimi Mosque has become visible and open. There is a wide yard in front of it. This yard was turned into a park and gardens above historical houses and buildings.

Photo taken after removing the buildings in front of the Ibrahimi Mosque

In this picture, Bab al-Nasour Qalawun and Well of Salah al-Din (Almaydaa) appear before the occupation removed them in 1968

Any archaeological excavation carried out by the occupation authorities or any encroachment on a building there is an encroachment on the Palestinian monuments and heritage. This area is an integral part of Palestine cultural heritage and historical extension over centuries. It is closely linked to the Ibrahimi Mosque.

Monthly Violations Table

1. Monthly Violations Table (January 2021):

#	Date	Attacked	Attacker	Location of assault	Description of assault
1	1-1-2021	A group of citizens	Israel Occupation Force (IOF)	Gates and entrances to the Old City and the Ibrahimi Mosque	Obstructing the passage of worshipers heading for Friday prayers in the Ibrahimi Mosque.
